WARNING :

Two wheel roller tests must not be carried out . Four wheel roller tests must be restricted to 5km/h.

IMPORTANT

OIL CHANGE DIESEL ENGINES

If the vehicle is operated on fuel with a high sulphur content (over 1%) the oil change intervals must not exceed 10,000 km

VEHICLES FITTED WITH SUPPLEMENTARY RESTRAINT SYSTEMS

The seatbelt pre-tensioners (where fitted) and air bags must be replaced every TEN YEARS

Side air bags must be replaced every FIFTEEN YEARS

IT IS RECOMMENDED THAT :

At 120,000 km or every six years, whichever is the sooner, all hydraulic brake fluid seal and hoses should be renewed.

All working surfaces of the caliper cylinders should be examined and renewed where necessary.

Vehicles used extensively in arduous/off road conditions - check the road wheel speed sensors, brake pads and calipers for abrasive wear at 1500 km intervals.

Air suspension vehicles used extensively in arduous/off road conditions will require the compressor inlet and exhaust filters to be replaced at more regular intervals .

When the vehicle is used in dusty or field conditions or deep wading , frequent attention to the air cleaner may be required .

When the vehicle is used in areas where fuel quality is poor, more frequent draining of the fuel filter/sedimentor may be required.
